INFORMATION TECHNOLOGY SERVICES

Since its inception in 2000, Water & Environmental Technologies (WET) has grown from a highly specialized group of groundwater professionals into a full-service geoscience, environmental, and engineering consulting firm that offers information technology (IT) services for your business. You have enough to manage—let WET's IT professionals manage all aspects of your IT network, web presence and digital communications design and maintenance.

IT Management
Design, maintenance and support for all or part of the day-to-day management responsibilities for your network environment.

IT Consulting
Utilize our expertise and knowledge of advanced technology and industry best practices for your specific environment and business.

IT Maintenance and Support
Maintenance for hardware (PCs, switches, servers, routers, and backups), software, and operating systems by Microsoft, Linux, and Mac.

System Engineering
Design of LANs, WANs, WI/FI and hardwired networks. Design of file storage and sharing, backups both on site and off site, domains or workgroups, and ISPs.

Network Cabling and Hardware Installation
Network cable layout design, routing and terminating. We troubleshoot existing connections and verify connections from A to B and install cabinets to house switches and/or computers and servers as well as other network devices.

Web Design and Support
Design and maintenance of custom websites using WordPress to meet your needs. We can help with hosting and securing domains as well.

Database Management and Support
Design and implementation of SQL, Access or other database systems for input, querying and reporting as well as web-based entry methods.

VoIP Design, Installation, and Support

Design assistance in a Voice over IP (VoIP) phone systems and installation. We provide support for adding phones, voicemail, conference room phones, and local numbers.
