

WHO WE ARE

We Are Here to Help!

The Community Protective Measures Program (CPMP) is a FREE county program available to ALL residences within the Superfund area. Our goal is to protect human health through education and outreach to help ensure a clean, safe environment for our community. As part of the education and outreach, residents living within the Superfund area are eligible to participate in the Soil Swap Program, Domestic Well Plan Coordination Program, and the Interior Dust Program.

WHAT WE DO

Soil Swap Program

We provide clean replacement topsoil for new or existing gardens to help ensure food crops are grown in safe soil. We also provide sand boxes and clean sand so children can have a safe place to play and dig.

Blood Lead Monitoring

Free blood lead monitoring services are available for anyone living within or around Anaconda. These services are provided at the Community Hospital of Anaconda.

Community Education & Outreach Program

We partner with local government to educate schools, realtors, & contractors about Superfund. We team with medical professionals to answer the public's Superfund related questions & concerns.

Mapping

We provide the public with cleanup information. This includes sampling, remedy, and property assessment data.

Interior Dust Program

Renovating or Remodeling? Let us help guide you in lead safe renovation techniques to minimize the spread and exposure to potential lead dust. We offer free Renovation Kits and have HEPA vacuums we loan out for free to help reduce the exposure to lead dust.

We can also conduct a free home assessment as part of the Interior Dust Program for anyone concerned with lead exposure or if anyone in the residence has been tested and has an elevated blood lead level.

Domestic Well Plan

We help determine if residents live within the Domestic Well Overlay and submit Test-by-Request well sampling inquiries to Atlantic Richfield for free arsenic sampling of your well.

Coordinating Superfund Cleanup Efforts

Coordinating with you, the County, and Atlantic Richfield on soil and attic sampling requests. We provide you the sampling results and domestic well sampling information. We will answer your questions and help guide you through the cleanup process.

Weed Reimbursement Program

We help prevent the spread of noxious weeds by refunding 25% of weed spraying costs, including professional services, for eligible property owners.
